

## V-SWITCH

Touchless access. No compromise.

The V-SWITCH is a **touchless laser sensor** that enables **smooth, hygienic door activation** with a simple hand gesture, ideal for hospitals, clean rooms, restaurants, and other **sensitive environments**. With multiple modes and flexible settings, it adapts easily to different needs (hands-free, keyless, toggle).

**Ceiling installation** reduces the risk of damage or vandalism, while enhancing safety and durability. Indeed, mounted out of reach, it keeps surfaces clean and easy to maintain.

**Fully operational in no time**, it offers peace of mind and consequently minimizes downtime, allowing maintenance teams to reallocate resources efficiently.

### *The challenges we address*

**More hygiene**  
through touchless  
activation

**Ready in seconds**  
with a simple plug &  
go setup

**Out of reach**  
through ceiling mount-  
ing

### Touchless & hygienic activation

Ceiling-mounted and contactless, the V-SWITCH ensures hygiene in sensitive environments. It stays protected while nearby surfaces are easier and safer to clean, preserving performance and preventing interference with door operation.

### Versatile solution

The V-SWITCH adapts to a wide range of configurations and needs. It enables intuitive, contactless opening, ideal for environments requiring accessibility, smooth circulation, or creative solutions to support user autonomy, such as in care homes or hospitals.

### Plug & go and low-maintenance solution

The V-SWITCH allows for rapid installation, ensuring the site is fully operational in no time. Maintenance teams are quickly reassigned to higher-value tasks. A seamless integration that stands as a reliable, long-term investment in peace of mind.

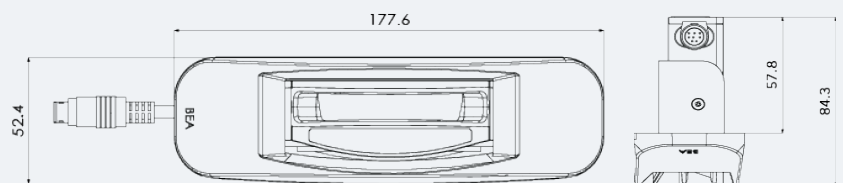

### Vandal-resistant design

Mounted on the ceiling, the V-SWITCH is out of reach, significantly reducing the risk of tampering or vandalism. Its discreet position ensures a higher level of security and long-term durability, making it a dependable choice for sensitive environments.

## DISCREET DESIGN, REGULATED OPENING

2 AVAILABLE COLOURS

### Laser technology powering the opening solution

The V-SWITCH combines versatility, hygiene, peace of mind, and enhanced security in one discreet ceiling-mounted solution, built for efficient, contactless door activation across demanding environments.
