**DESCRIPTION**

1. radar antenna (narrow field)  
2. radar antenna (wide field)  
3. IR-curtain width adjustment  
4. IR-lenses  
5. cover  
6. main connectors  
7. push button  
8. DIP-switch  
9. IR-curtain angle adjustment knob

User’s Guide for product version 0202 and higher  
See product label for serial number

Openings & Safety Sensor for Automatic Sliding Doors  
(according to EN 16005 and DIN 18650, including emergency exits)
The sensor should be fixed firmly to avoid extreme vibrations.

Do not cover the sensor.

Avoid moving objects and light sources in the detection field.

Avoid highly reflective objects in the infrared field.

It is recommended to clean the optical parts at least once a year or more if required due to environmental conditions.

Do not use aggressive products to clean the optical parts.

The door control unit and the door cover profile must be correctly earthed.

Only trained and qualified personnel may install and setup the sensor.

Always test the good functioning of the installation before leaving the premises.

The warranty is invalid if unauthorized repairs are made or attempted by unauthorized personnel.

- The device cannot be used for purposes other than its intended use. All other uses cannot be guaranteed by the manufacturer of the sensor.
- The manufacturer of the door system is responsible for carrying out a risk assessment and installing the sensor and the door system in compliance with applicable national and international regulations and standards on door safety.
- The manufacturer of the sensor cannot be held responsible for incorrect installations or inappropriate adjustments of the sensor.
1 MOUNTING & WIRING

The size of the detection field varies according to the mounting height of the sensor. In emergency exits the full door width must be covered.

Plug the connector with the WHITE and GREEN wires on top towards the sensor cover.

2 RADAR OPENING IMPULSE FIELD

**ANGLE**

from 15° to 45°, default 30°

field size: 9
immunity: 2

from -15° to 15°, default 0°

field size: 9
immunity: 2

**WIDTH**

4 m x 2 m (wide)

field size: 9
immunity: 2

2 m x 2.5 m (narrow)

field size: 9
immunity: 2

The size of the detection field varies according to the mounting height of the sensor. In emergency exits the full door width must be covered.
### 3 INFRARED SAFETY FIELD

**DIN 18650**  
**BS 7036**  
**EN 16005**

#### ANGLE

Activate the visible* spots to verify the position of the IR-curtain.  
If necessary, adjust the IR-curtain angle (from -7° to 4°, default 0°).

---

* Visibility depends on external conditions. When spots are not visible, use the Spotfinder to locate the curtains.

** ** The distance between the inner curtain of the inside door sensor and the inner curtain of the outside door sensor should always be smaller than 20 cm. The distance to the door leaf depends therefore on the thickness of the door leaf.

---

#### WIDTH

Part of the detection field can be masked to reduce it.  
The arrow position determines the width of the detection field.

Always verify the actual detection field width with a piece of paper and not the Spotfinder, which detects the whole emitted field.

---

Mounting height | Detection width
---|---
2.00 m | 2.00 m
2.20 m | 2.20 m
2.50 m | 2.50 m
3.00 m | d max
3.50 m | d max

**DIN 18650** BS 7036

$\frac{d_{\text{max}} = 2.5 \, \text{m}}{3.50 \, \text{m}}\quad \frac{3 \, \text{m}}{3.00 \, \text{m}}\quad \frac{2.50 \, \text{m}}{2.50 \, \text{m}}\quad \frac{2.00 \, \text{m}}{2.00 \, \text{m}}$

The size of the detection field varies according to the mounting height and the settings of the sensor.  
The full door width must be covered.

---

### 4 DIP-SWITCH 1-4: CAN-ADDRESS

DIP-switches: each sensor needs a different CAN address depending on its position. 
After changing a DIP-switch, the orange LED flashes quickly. Cut and restore power supply to confirm the setting.

** TIP!  
Additional adjustments are possible (see p. 6)

---

- **SENSOR 1**: address 0  
- **SENSOR 2**: address 1  
- **SENSOR 3**: address 2  
- **SENSOR 4**: address 3  
- **SENSOR 5**: address 4  
- **SENSOR 6**: address 5  
- **SENSOR 7**: address 6  
- **SENSOR 8**: address 7  
- **SENSOR 9**: address 8  
- **SENSOR 10**: address 9  
- **SENSOR 11**: address 10  
- **SENSOR 12**: address 11  
- **SENSOR 13**: address 12  
- **SENSOR 14**: address 13  
- **SENSOR 15**: address 14  
- **SENSOR 16**: address 15
5 DIP-SWITCH 5: POSITION IN CHAIN

On the last sensor of the chain, adjust DIP-switch 5 to ON. The orange LED next to the DIP-switch will be on permanently.

DOOR CONTROLLER SENSOR 1  SENSOR 2  SENSOR 3

BEA REMOTE CONTROL

Unlock  Select parameter  Select value  Lock

6 PRESETTINGS

You can choose one of the following presettings:

STANDARD:  standard in- and outdoor installations  factory values for immunities, IR number and redirection

CRITICAL ENVIRONMENT:  critical installations due to surroundings or weather  increased immunities, 1 curtain

SHOPPING STREET:  installations in narrow streets with pedestrian traffic  increased immunities, redirection = motion and presence

### FACTORY RESET

Complete reset to factory values

### SETUP 1 (QUICK)

Reference picture

### SETUP 2 (ASSISTED)

Test of full door cycle + reference picture

### STEP OUT OF THE INFRARED FIELD!

Always additionally adjust the arrow position on the sensor with a screwdriver.

**Motion or Presence Detection:**

- Opening output is active in case of:
  - 0: motion detection
  - 1: presence detection
  - 2: motion and presence detection

**Factory Value:**

- Excludes conformity of the door system according to EN 16005 / DIN 18650 / BS 7036.
- IR Immunity on values 4 or 5 is incompatible with IR presence time on value 0.
- Not allowed when the sensor is used in emergency exits.

**Service Mode:**

- No IR detection during 15 minutes (maintenance).
  - This value excludes conformity of the door system to EN 16005 and DIN 18650.

**Service Mode Settings:**

- service mode = no IR detection during 15 minutes (maintenance).

**Frequency Adjustment:**

- Sensors mounted close to each other need a different frequency.

**Recommended Parameters:**

- IR Immunity on values 4 or 5 is incompatible with IR presence time on value 0.
## Troubleshooting

<table>
<thead>
<tr>
<th>LED Flash Pattern</th>
<th>Description</th>
<th>Solution(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>E1 ORANGE LED flashes 1 x.</td>
<td>The sensor signals an internal fault.</td>
<td>Replace sensor.</td>
</tr>
<tr>
<td>E2 ORANGE LED flashes 2 x.</td>
<td>The power supply is too low or too high.</td>
<td>1. Check power supply. 2. Check wiring.</td>
</tr>
<tr>
<td>E4 ORANGE LED flashes 4 x.</td>
<td>The sensor receives not enough IR-energy.</td>
<td>1. Decrease the angle of the IR-curtains. 2. Increase the IR-immunity filter (values &gt;2.8 m). 3. Deactivate 1 curtain.</td>
</tr>
<tr>
<td>E5 ORANGE LED flashes 5 x.</td>
<td>The sensor receives too much IR-energy.</td>
<td>1. Slightly increase the angle of the IR-curtains. Decrease the IR-immunity filter (values 1-3 &lt;2.8 m).</td>
</tr>
<tr>
<td>E6 ORANGE LED flashes 6 x.</td>
<td>Faulty radar sensor output</td>
<td>1. Replace sensor.</td>
</tr>
<tr>
<td>E7 ORANGE LED flashes 7 x.</td>
<td>The internal test of the radar is disturbed.</td>
<td>1. Change radar field angle or antenna. 2. Launch a quick setup. 3. If orange LED flashes again, replace sensor.</td>
</tr>
<tr>
<td>E8 ORANGE LED flashes 8 x.</td>
<td>IR power emitter is faulty.</td>
<td>1. Replace sensor.</td>
</tr>
<tr>
<td>E9 ORANGE LED flashes 9 x.</td>
<td>Internal reference of the radar is faulty.</td>
<td>1. Replace sensor.</td>
</tr>
<tr>
<td>ORANGE LED is on.</td>
<td>The sensor encounters a memory problem.</td>
<td>1. Cut and restore power supply. If orange LED lights up again, replace sensor.</td>
</tr>
<tr>
<td>RED LED flashes quickly after an assisted setup.</td>
<td>The sensor sees the door during the assisted setup.</td>
<td>1. Move the IR-curtains away from the door. 2. Install the sensor as close to the door as possible. If needed, use a bracket accessory. 3. Launch a new assisted setup.</td>
</tr>
<tr>
<td>RED LED lights up sporadically.</td>
<td>The sensor vibrates.</td>
<td>1. Check if the sensor is fastened firmly. 2. Check position of cable and cover.</td>
</tr>
<tr>
<td></td>
<td>The sensor sees the door.</td>
<td>1. Launch an assisted setup and adjust the IR angle.</td>
</tr>
<tr>
<td></td>
<td>The sensor is disturbed by external conditions.</td>
<td>1. Increase the IR-immunity filter to value 3 (&lt; 2.8 m). Select presetting 2 or 3.</td>
</tr>
<tr>
<td></td>
<td>The sensor is disturbed by rain and/or leaves.</td>
<td>1. Select presetting 2 or 3. 2. Increase radar-immunity filter.</td>
</tr>
<tr>
<td></td>
<td>Ghosting created by door movement.</td>
<td>1. Change radar field angle.</td>
</tr>
<tr>
<td></td>
<td>The sensor vibrates.</td>
<td>1. Check if the sensor and door cover is fastened firmly. 2. Check position of cable and cover.</td>
</tr>
<tr>
<td></td>
<td>The sensor sees the door or other moving objects.</td>
<td>1. Remove the objects if possible. 2. Change radar field size or angle.</td>
</tr>
<tr>
<td></td>
<td>The LED is off.</td>
<td>1. Check power supply and wiring.</td>
</tr>
<tr>
<td></td>
<td>The reaction of the door does not correspond to the LED-signal.</td>
<td>1. Check CAN communication.</td>
</tr>
<tr>
<td></td>
<td>The remote control does not react.</td>
<td>1. Enter the right password. If you forgot the code, cut and restore the power supply to access the sensor without entering a password during 1 minute.</td>
</tr>
